DISPLAYS / SAMPLE TOOL BOXES

Display Generation X² with HT22

- ▶ SAP No.: 2867327
- ▶ High-quality cutting technology display showing the complete delivery range of WIRTGEN round-shank picks for cold milling machines and the quick-change toolholder system HT22. Perfect for use at fairs and events or trainings

Display Generation X² with HT22 “small”

- ▶ SAP No.: 2870249
- ▶ High-quality display showing our quick-change toolholder system HT22 with picks of the GENERATION X². Perfect for use in sales talks or as a promotional gift

Display GENERATION Z² with WCC Plus

* Exemplary picture

- ▶ SAP No.: 2868099
- ▶ High-quality cutting technology display showing the complete delivery range of WIRTGEN round-shank picks for cold recyclers and soil stabilizers and the WCC Plus cutting tool. Perfect for use at trade shows and events or trainings

Display GENERATION C²

* Exemplary picture

- ▶ SAP No.: 3072734
- ▶ High-quality cutting technology display equipped with the round-shank picks of the GENERATION C². Perfect for use at trade shows and events or trainings

Display toolholder system HT22

- ▶ SAP No.: 2868100
- ▶ High-quality cutaway model to demonstrate the function of our quick-change toolholder system HT22 and the upper toolholder part HT22 PLUS at fairs and events or trainings

Display WIRTGEN conveyor belts

- ▶ SAP No.: 2530392
- ▶ High-quality display which shows the WIRTGEN conveyor belts as cutaway model. Perfect for use at fairs and events or trainings

Sample toolbox stabilizer and recycler

- ▶ SAP No.: 2564356 (German)
- ▶ SAP No.: 2564357 (English)
- ▶ This sample toolbox includes the most important picks and carbide tips for stabilizers and recyclers as well as a brochure with the recommendations for application for our GENERATION Z picks. The ideal sales tool if you want to show your customers the WIRTGEN product range of cutting tools for stabilizing and recycling machines

Sample toolbox road milling machines

- ▶ SAP No.: 2417207 (German)
- ▶ SAP No.: 2417208 (English)
- ▶ This sample tool box including the most important picks and carbide tips for road milling machines as well as a brochure with the recommendations for application for our GENERATION X² picks. The ideal sales tool if you want to show your customers the WIRTGEN product range of cutting tools for road milling machines

WIRTGEN GROUP SAFETY JACKETS

WIRTGEN GROUP Safety Jacket (ROFA)

- SAP No.: 2176863 (XL), 2129045 (S), 2176861 (M), 2176862 (L), 2176864 (2XL), 2176865 (3XL), 2176866 (4XL)
- This jacket is delivered including a removable inner fleece jacket which can also be used separately. It is ideally suited for outdoor use at machine presentations or events. Features Outer fabric: 100% polyester, with PU-membran (outer fabric laminate), approx. 150 g/square meter Lining: Quality 16, 100% Polyester, approx. 70 g/square meter Certifiable according to EN 343 (class 3/3) Certifiable according to 20471 class 3
- Price: € 185,00 – 210,00

Roll-Up Oscillation

A WIRTGEN GROUP COMPANY

 **HAMM**

OSCILLATION - high-quality and efficient

➤ 35 years of experience ➤ More than 35 models with oscillation

- High compaction performance - great efficiency
- No over-compaction nor grain crushing
- High-quality compaction
- Minimal vibration in the surrounding area
- Perfect awareness and initial shif resistance
- Compaction at low depth or ambient temperatures
- Self-regulating system, requires no adjustments

With oscillation, two unbalance shafts which are offset by 180° rotate synchronously. This causes the drums to oscillate vertically alternating forward-backward every moment, with the result that the compaction energy is directed into the underground longitudinally to the front and rear beam of these rollers.

Compaction in
asphalt & earth work

www.hamm.eu

- SAP No.: 2642328 (German), 2642330 (English)
- Use these practical roll-ups to inform your customer about the company, its products and most important technologies. The roll-ups are very easy to handle and available for the following topics: HAMM AG, oscillation, HAMM Power Hybrid, operating concept Easy Drive, VC compactor and electrified rollers. Size: 85 x 200 cm
- Price: € 130,00
- Please contact astrid.beer@hamm.eu for more information

Roll-Up Power Hybrid

A WIRTGEN GROUP COMPANY

 **HAMM**

POWER HYBRID -
alternative energy ingeniously used

- Simplified exhaust aftertreatment
- Reduction of up to 15% in fuel consumption thanks to the hybrid drive and start-stop system
- CO2 emissions reduction
- Torque-assisted drive system
- Cost-effective package solution
- Same functionality and operation as a standard machine
- Low noise level

- Diesel engine with balanced output (power engine + accumulator for hydraulic energy)
- Peak loads are handled by means of the hydraulic accumulator (e.g. when starting up the vibration drum, accelerating/starting up the engine)
- The diesel engine's power reserves are used to recharge the hydraulic accumulator

One weight class - two technological drive solutions:

DIESEL ENGINE 85 KW

Direct engine output

DIESEL ENGINE 55.4 KW + HYDRAULIC ACCUMULATOR

Accumulator
Diesel engine output

Roll-Up E-Roller

A WIRTGEN GROUP COMPANY

 **HAMM**

**ELECTRIC
TANDEM ROLLER -**
clever use of alternative technology

The benefit to you

- 100% electric drive, no local emissions
- Maximum compaction power
- Maximum efficiency for high battery runtimes and long operating times
- Reduced noise emissions
- Operation identical to the diesel machine
- Zero-maintenance electronic components
- Optimal use of energy for long operating times
- Energy recuperation
- 20% less hydraulic oil

HD 10e / HD 12e

- Operating weight: 2.5-2.7 t
- Types: VV, VC, VE, CE
- Battery voltage: 48 V Li-ion battery
- Battery capacity: 23.4 kWh
- Period of work: Enough energy for a typical working day
- Charging time: approx. 4 hours at 400 V/15 A
